

ANDREA J. CHONG

Front-End Developer

OBJECTIVE

Highly motivated, self-taught front-end developer with solid foundation who wants to learn and gain real experience is seeking an opportunity of **entry level/junior front-end developer position**. Ready to start from the bottom to become a professional developer.

PERSONAL PROJECTS

Ceramic Studio Website

Built a front-end responsive website introducing a ceramic studio using HTML, CSS/SASS (flexbox and grid), and JavaScript.

Paint Web Application

Web paint application with essential drawing features. Built by HTML5's canvas, CSS, and JavaScript's Canvas API/DOM manipulation/functions.

React Momentum

Single page web application cloning Momentum, including live clock, calendar, weather forecast, links, and todo list. Developed with React JS (fetch API, Hooks, Redux, etc.)

Jobs Scraper

Built a simple programming job postings scraper with searching by term. Used Python (beautifulsoup4 for pulling data out of HTML) and Flask.

Portfolio Website

Single page portfolio website by React JS. Projects are available in this website. <https://uhsandrea.github.io/my-portfolio>

WORK EXPERIENCE
